

PECULIAR PICTURE FRAMES

Framing whimsical clip-art silhouettes is a super simple project that will instantly make your walls “creepy chic.” Assorted spray-painted black frames pair perfectly with stark white backgrounds, and arranging the frames in the glow of candlelight will add to the eeriness.

You Will Need:

From Savers/Value Village

- 4 or more picture frames (with glass intact), in assorted sizes

Other supplies

- Black matte spray paint
- Silhouette clip art of your choice (we've provided some below to start)
- Printer
- Heavy white card stock
- Scissors

Directions:

- 1) Remove backing and glass from picture frames and clean. Spray frames with several light coats of black spray paint. Allow several hours to completely dry before hanging.
- 2) Print out spooky silhouettes onto card stock paper (enlarge or reduce to your liking). Decide which silhouettes will go into which frames and trim to size.
- 3) Replace glass into frames and insert silhouettes.
- 4) Arrange frames on the walls as desired and hang.
